### **Keynote Speakers**

#### **Michael Dowling**

#### President and CEO, Northwell Health

Michael Dowling is one of health care's most influential voices, taking a stand on societal issues such as gun violence and immigration that many health system CEOs shy away from. As president and CEO of Northwell Health, he leads a clinical, academic and research enterprise with a workforce of more than 89,000 and an annual operating budget of \$19.7 billion.

Mr. Dowling has been honored with many awards over the years. In 2020, he received the Presidential Distinguished Service Award for the Irish Abroad, which recognizes individuals for their contributions to Ireland and to Irish communities abroad, presented by the President of Ireland. He also received an honorary fellowship of the Royal College of Physicians of Ireland and is a board member of the Foreign Policy Association. In addition, he received the Ellis Island Medal of Honor and a number of honorary degrees from Fordham University, University College Dublin (Ireland) and the prestigious Queen's University Belfast.

In 2020, Mr. Dowling received the Deming Cup from the Columbia School of Business and has been ranked No. 1 on Modern Healthcare's 100 Most Influential People in Healthcare in 2022. In 2017, he served as the grand marshal of the St. Patrick's Day Parade in NYC. He also chairs the Institute for Healthcare Improvement. Prior to joining Northwell in 1995, Mr. Dowling served in New York state government for 12 years. He held several leadership roles, including director of health, education and human services; commissioner of social services and deputy secretary and chief adviser to former Governor Mario Cuomo. Mr. Dowling was previously a professor of social policy and an assistant dean of Fordham's Graduate School of Social Services.

#### Rulla Tamimi, ScD

#### Chief, Division of Epidemiology, Population Health Sciences, Weill Cornell Medicine

Dr. Rulla Tamimi is the inaugural chief of the Division of Epidemiology in the Department of Population Health Sciences and the associate director of population science at the Meyer Cancer Center.

Dr. Tamimi is an esteemed cancer epidemiologist whose research focuses on breast cancer risk and prognosis. As a principal investigator on numerous NIH-funded grants and author of over 200 peer-reviewed publications, she has identified a number of genetic, molecular and lifestyle predictors of breast cancer risk. Her foundational work includes studies on early life and environmental exposures' link to breast disease, molecular characterization of breast tumors, and mammographic features as predictors of breast cancer. Her long-term goals are to identify strategies to prevent breast cancer and improve health equity along the cancer care continuum.

Prior to Weill Cornell, she was an associate professor in epidemiology at the Harvard T.H. Chan School of Public Health, associate professor of medicine at Harvard Medical School, served as PI of the Nurses' Health Study, and the co-lead of the Breast Cancer Program at the Dana Farber/Harvard Cancer Center.
